

ABDALLAH ZAGHLOUL

Frontend Developer & Team Lead (React)

✉ f2002.a.z@gmail.com ☎ +963932200022 📍 Damascus, Syria

✅ Available for worldwide remote opportunities 🔗 Portfolio 🔗 LinkedIn

Professional Summary

Frontend Developer with 3+ years shipping production React and Next.js apps. At PawsPalConnect, led a 3-person remote frontend team and delivered a pet-care platform covering booking, medical tracking, and commerce. Currently building IoT dashboards and motion-heavy marketing sites at Sama-Tech (TypeScript, Tailwind, Zustand). Also designs and ships the API and mobile client when needed — including Nova, a full task platform across web, Expo, and NestJS.

Work Experience

- | | |
|---|-------------------|
| Frontend Web Developer, Sama-Tech | 03/2026 – Present |
| <ul style="list-style-type: none">Engineered a multi-page corporate marketing website using Next.js 16 and React 19, showcasing IoT and ESG solutions with interactive, scroll-driven UI behaviors powered by Framer Motion and GSAP.Built a multi-module admin dashboard (Sama Fire) utilizing React 19 and Vite for real-time gateway monitoring, incident events, and maintenance workflows.Implemented role-based access control, organization-wide filtering, and Firebase push notifications, ensuring live data synchronization across events and Mapbox GL map views.Architected scalable and responsive front-end solutions utilizing Tailwind CSS v4, TypeScript, and Zustand. | |
| Frontend Web Developer (Freelance) | 2023 – Present |
| <ul style="list-style-type: none">Developed 5+ responsive web applications, focusing on high performance and component reusability.Built custom booking systems and API-driven dashboards for international clients.Optimized web performance and accessibility, achieving 90+ Lighthouse scores for key client projects. | |
| Frontend Team Lead (React), PawsPalConnect | 10/2025 – 02/2026 |
| <ul style="list-style-type: none">Lead and mentor a 3-person frontend team: technical decisions, reviews, and delivery.Architected a production-grade pet-care platform utilizing React 19 and Redux Toolkit, resulting in a highly scalable and maintainable codebase.Developed complex features including appointment booking, vaccination tracking, and an e-commerce dashboard.Implemented a modern, responsive design system using Tailwind CSS v4, reducing CSS technical debt.Integrated real-time data visualization using Chart.js and Recharts for operational insights. | |
| Frontend Web Developer, Goma+ | 11/2022 – 11/2023 |
| <ul style="list-style-type: none">Built responsive React and Tailwind interfaces with a cross-functional team.Maintained production UI and fixed performance issues that were driving bug reports. | |

Projects

Nova — Task & collaboration platform

Designed and shipped a Linear-style product across web, mobile, and backend: projects, Kanban, Gantt/timeline, whiteboards, and Super Admin.

- Web: Next.js 16 / React 19 app with a shared glass UI system, JWT auth, and a Super Admin console (users, support, broadcasts, AI quotas, audit log).
- Mobile: Expo (React Native) app with NativeWind, the same product flows, push notifications, and a live system-status banner.
- API: NestJS, Prisma, PostgreSQL, role-based access, OTP/auth, Gemini quotas, support tickets, and Supabase Realtime (no polling for live status).

Clinic Management System (Administrative & Doctor Dashboards)

- Designed Administrative and Doctor dashboards with a focus on workflow efficiency.
- Implemented multi-language support (i18n) to cater to international clinic operations.

HR Management System

Built internal tools for employee profiles and real-time attendance visualization.

E-Commerce Web Application

Developed a high-performance frontend with real-time state synchronization for cart management.

Medical Clinic System (Infertility Clinic)

- Engineered patient-facing interfaces with a focus on accessibility and mobile responsiveness.
- Collaborated with cross-functional teams to build responsive interfaces using React and Tailwind CSS.
- Maintained existing codebases, reducing bug reports by resolving critical performance bottlenecks.

Skills

Frontend

React (18/19), Next.js (16), TypeScript (Core), JavaScript (ES6+), HTML5, CSS3, React Router.

UI & Motion

Tailwind CSS (v4), Material UI, GSAP, Framer Motion, DaisyUI.

APIs, Cloud

Supabase, Firebase (FCM), Google Gemini.

Localization

i18n, i18next.

Backend & data

NestJS, Prisma, PostgreSQL, REST APIs, Passport JWT

State Management & Data Fetching

Redux, Redux Toolkit, Zustand, React Query, Context API.

3D, Maps & Interactive

Three.js, Mapbox GL.

Process

Agile/Scrum, Sprint Planning, Code Reviews

Mobile

Expo, React Native, NativeWind

Tooling

Axios, Vite, Git, GitHub

Academic History

BSc in Information Technology (AI Specialization), Al-Sham Private University

03/2025

Languages

Arabic
